“ *Rick was a very valuable member of the Battleship Texas' volunteer crew. He was always eager to help. He worked on many different projects throughout his time as a volunteer, but the one that stands out the most was right before the ship was towed for repairs. He strung lights on the bow of the that proved to be a much-needed safety measure for the crew. All of the volunteers and staff will miss him. Kandace- Battleship Texas Foundation*

“ Richard was one of my first and dearest friends when I moved back to Texas. We hung out in high school and at Bear Creek Park. He patiently tried to teach me to drive a stick shift vehicle on his truck. Of course, I had to stand in front of the seat to reach the clutch. When I purchased my first vehicle, I bought a stick shift and finally learned to drive it. Richard was kind, loyal and funny. It was a joy to be his friend. Missed and loved, Julie
